

**VERSA**  
INTEGRITY GROUP

Inspection Services

## PLANT MECHANICAL INTEGRITY INSPECTION

Versa Integrity Group has over 75 API and NDT personnel engaged in plant mechanical inspection programs on a daily basis.

Our inspectors have experience working in refineries, chemical plants, pipeline compressor stations, gas processing facilities, cryogenic plants, storage facilities, and other processing facilities.

We ensure that personnel conducting inspections are certified to API 510, API 570, and API 653, in conjunction with ASNT SNT-TC-IA criteria that meet the intent of OSHA 1910.119 (b) and other regulatory agencies incorporated into the intent of mechanical integrity programs.

## Inspection Service Offerings

- API 510, 570, and 653 visual inspections
- Conventional or Digital profile radiography/weld quality
- Ultrasonic inspection
  - Thickness measurement
  - Shear Wave
- Liquid Penetrant inspection
- Magnetic Particle inspection
- Positive Material Identification
  - Hardness Testing
  - Advanced Services
  - Guided Wave Testing
- Tubular Inspection
- Automated Ultrasonics

## Bringing inspection to new heights

Versa Integrity Group's rope access services can be used to assist with any of the above mentioned inspection techniques at elevated and/or difficult to reach locations. The cost savings that have been realized by our customers are significant due to the reduction of fixed scaffolding that was previously required to reach these areas.
