

VERSA
INTEGRITY GROUP

OFFSHORE SERVICES

Versa Integrity Group has been engaged in offshore projects for over forty years. We know a thing or two.

Whether it's a mechanical integrity inspection, nondestructive testing, coating and corrosion surveys, or even light maintenance, we have the personnel to handle the job.

We comply with all BOEMRE and BSEE regulations. In fact, we're prepared to review existing mechanical integrity programs and make recommendations to you to adjust your existing program for compliance.

Coupled with the extensive experience of our rope access team, Versa Integrity Group provides cost-effective solutions to your hard-to-reach offshore challenges.

Offshore Service Offerings

TLP/SPAR Inspections

Versa Integrity Group has been engaged in floating TLP/SPAR inspections for over ten years. We furnish rope access personnel to accommodate elevated locations requiring close visual inspections of major joints. Our personnel are able to access under deck structural joints, under cellar deck main jacket leg connections, cross member brace inspections, and internal hull void access without the need for fixed scaffolding.

Mechanical Integrity Inspection

Our inspection teams are proficient in conducting visual inspections and NDE. The data is collected using ultrasonic thickness and profile radiography techniques. We conduct piping and vessel inspections that meet all requirements of BOEMRE and BSEE.

ABS External Specialist

Versa Integrity Group maintains an ABS external specialist certificate for tension leg platforms (TLP). This certificate assures our deep water clients operating TLPs and SPARs that the company has met the training and certification of technicians engaged in the hull thickness inspection of their units.

Coating Inspections

Our personnel are able to provide project management, coating and corrosion surveys, and inspection during coating preparation and application. We have extensive experience with deepwater and continental shelf offshore inspections.
